

Network Configuration Compliance

Assessed 75 device(s) against 15 controls · Generated 2026-09-13T09:43:41 · Controls version 320e51b

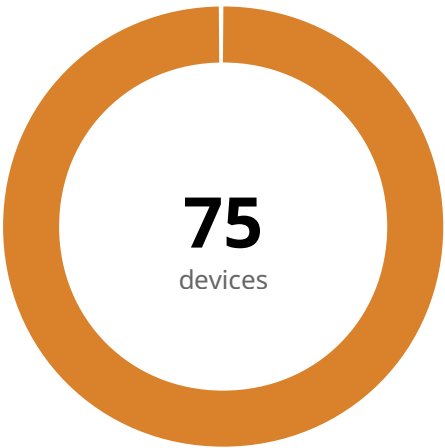

Executive Summary

Overall Configuration Posture: MODERATE RISK. 75 network device(s) were evaluated against 15 configuration controls. Strict verified compliance is 82.4% with 100.0% assessment coverage. 75 device(s) contain unresolved deviations. VTY Lines represents the largest systemic gap.

Key Metrics

Device Detail

domain_config_01 - 73.3% (11/15)			
CONTROL	STATUS	SEVERITY	FINDING
control_00001 - Hostname	PASS	LOW	The 'hostname' line in the running configuration.
control_00002 - Domain	FAIL	LOW	No 'ip domain name' command found in device configuration. Remediation: Apply the correct domain using: ip domain name <company_name>.
control_00003 - AAA	PASS	HIGH	All 'aaa' commands in the running configuration.
control_00004 - TACACS	PASS	HIGH	'tacacs server' definitions and keys in the running configuration.
control_00005 - Local and emergency users	PASS	HIGH	'username' and 'enable secret' lines in the running configuration.
control_00006 - SSH	FAIL	HIGH	IP domain-name is not configured. Remediation: Generate RSA keys with a minimum modulus of 2048 bits after setting the hostname and domain.
control_00007 - Global password encryption	PASS	HIGH	'key 6 <encrypted_string>' format on sensitive keys in the running configuration, and 'password encryption aes' present.
control_00008 - ACL for VTY	PASS	HIGH	'ip access-list extended' in the running configuration.
control_00009 - NTP	FAIL	MEDIUM	'ntp server 10.10.10.100 prefer': missing a 'key <id>' reference to the NTP authentication key.; 'ntp server 20.20.20.100': missing a 'key <id>' reference to the NTP authentication key. Remediation: Configure at least two reliable NTP servers, use the 'prefer' keyword for the primary source, and enable NTP authentication.
control_00010 - Syslog	PASS	MEDIUM	'logging' commands in the running configuration.
HIGH			

CONTROL	STATUS	SEVERITY	FINDING
control_00011 - SNMP	PASS		'snmp-server' configuration lines and 'show snmp user' output.
control_00012 - Banners	PASS	MEDIUM	'banner motd' section in the running configuration.
control_00013 - Passwords	PASS	HIGH	'security passwords min-length' and 'service password-encryption' commands.
control_00014 - VTY Lines	FAIL	HIGH	'line vty 0 15': 'login authentication default' is missing.; 'line vty 0 15': 'transport output' is not restricted to secure protocols. Remediation: Apply 'exec-timeout' and a password on all access lines; use 'login local' on console and 'login authentication default' on VTY; restrict transport input and output to secure protocols; bind VTY lines to a named ACL via 'access-class <name> in'.
control_00015 - Local user and enable secret	PASS	HIGH	'enable secret' and 'username ... privilege 15' in configuration.

aaa_config_02 - 80.0% (12/15)

CONTROL	STATUS	SEVERITY	FINDING
control_00001 - Hostname	PASS	LOW	The 'hostname' line in the running configuration.
control_00002 - Domain	PASS	LOW	The 'ip domain name' command in the running configuration.
control_00003 - AAA	FAIL	HIGH	Required AAA command missing (expected to match '^aaa accounting exec default start-stop group \S+').; Required AAA command missing (expected to match '^aaa accounting commands 1 default start-stop group \S+').; Required AAA command missing (expected to match '^aaa accounting commands 15 default start-stop group \S+'). Remediation: Implement the full AAA suite (Authentication, Authorization, and Accounting) pointing to the authorized TACACS group.

CONTROL	STATUS	SEVERITY	FINDING
control_00004 - TACACS	PASS	HIGH	'tacacs server' definitions and keys in the running configuration.
control_00005 - Local and emergency users	PASS	HIGH	'username' and 'enable secret' lines in the running configuration.
control_00006 - SSH	PASS	HIGH	Output of 'show ip ssh' or absence of zeroize commands.
control_00007 - Global password encryption	PASS	HIGH	'key 6 <encrypted_string>' format on sensitive keys in the running configuration, and 'password encryption aes' present.
control_00008 - ACL for VTY	PASS	HIGH	'ip access-list extended' in the running configuration.
control_00009 - NTP	FAIL	MEDIUM	'ntp server 10.10.10.100 prefer': missing a 'key <id>' reference to the NTP authentication key.; 'ntp server 20.20.20.100': missing a 'key <id>' reference to the NTP authentication key. Remediation: Configure at least two reliable NTP servers, use the 'prefer' keyword for the primary source, and enable NTP authentication.

Control Detail

control_00001 - Hostname (96.0% compliant, 3 affected)

DEVICE	STATUS	FINDING
hostname_config_01	FAIL	Hostname 'Router' is generic.; Hostname 'Router' does not follow the COMPANY_COUNTRY_TYPE_FUNCTION_SITE_DEVICE convention (expected at least 6 underscore-separated parts).
hostname_config_02	FAIL	Hostname 'ACME_USA_RT' does not follow the COMPANY_COUNTRY_TYPE_FUNCTION_SITE_DEVICE convention (expected at least 6 underscore-separated parts).
hostname_config_03	FAIL	Hostname 'ACME-USA-RT-INT-GOLDEN-01' does not follow the COMPANY_COUNTRY_TYPE_FUNCTION_SITE_DEVICE convention (expected at least 6 underscore-separated parts).

control_00002 - Domain (93.3% compliant, 5 affected)

DEVICE	STATUS	FINDING
domain_config_01	FAIL	No 'ip domain name' command found in device configuration.
domain_config_02	FAIL	Domain 'name othercorp.net' does not match the corporate domain 'name acme.com'.
domain_config_03	FAIL	Domain 'acme.com' does not match the corporate domain 'name acme.com'.
domain_config_04	FAIL	Domain 'name acem.com' does not match the corporate domain 'name acme.com'.
domain_config_05	FAIL	Domain 'name acme.org' does not match the corporate domain 'name acme.com'.

control_00003 - AAA (94.7% compliant, 4 affected)

DEVICE	STATUS	FINDING
aaa_config_02	FAIL	Required AAA command missing (expected to match '^aaa accounting exec default start-stop group \S+'); Required AAA command missing (expected to match '^aaa accounting commands 1 default start-stop group \S+'); Required AAA command missing (expected to match '^aaa accounting commands 15 default start-stop group \S+').
aaa_config_03	FAIL	

DEVICE	STATUS	FINDING
		AAA commands reference inconsistent TACACS groups: ['ACME_TACACS_GROUP', 'ACME_TACACS_SERVER_GROUP'].
aaa_config_04	FAIL	Required AAA command missing (expected to match '^aaa authentication login default group \S+ local').
aaa_config_05	FAIL	Required AAA command missing (expected to match '^aaa authorization commands 1 default group \S+ if-authenticated').

control_00004 - TACACS (94.7% compliant, 4 affected)

DEVICE	STATUS	FINDING
tacacs_config_01	FAIL	Fewer than two 'tacacs server' definitions found.
tacacs_config_02	FAIL	No 'ip tacacs source-interface' configured under the TACACS server group.
tacacs_config_03	FAIL	'tacacs server ACME_TACACS_01': timeout '30' does not match the corporate standard '10'.
tacacs_config_05	FAIL	'aaa group server tacacs+ ACME_TACACS_SERVER_GROUP': references server 'ACME_TACACS_2', which has no matching 'tacacs server ACME_TACACS_2' definition.

control_00005 - Local and emergency users (93.3% compliant, 5 affected)

DEVICE	STATUS	FINDING
emergency_user_config_01	FAIL	No local emergency user with 'algorithm-type scrypt' found.
emergency_user_config_02	FAIL	Emergency user 'admin_bckp': privilege level is '7', expected 15.
emergency_user_config_03	FAIL	No local emergency user with 'algorithm-type scrypt' found.
emergency_user_config_04	FAIL	Emergency user name 'admin_bkup' does not match the corporate standard 'admin_bckp'.
emergency_user_config_05	FAIL	

DEVICE	STATUS	FINDING
		No local emergency user with 'algorithm-type scrypt' found.

control_00006 - SSH (94.7% compliant, 4 affected)

DEVICE	STATUS	FINDING
domain_config_01	FAIL	IP domain-name is not configured.
ssh_config_02	FAIL	'ip ssh version' is set to '1', expected '2' per corporate standard.
ssh_config_04	FAIL	'ip ssh authentication-retries' is set to '10', expected '3' per corporate standard.
ssh_config_05	FAIL	'ip ssh time-out' is set to '300', expected '60' per corporate standard.

control_00007 - Global password encryption (94.7% compliant, 4 affected)

DEVICE	STATUS	FINDING
password_encryption_config_01	FAIL	'key config-key password-encrypt <device_master_key>' is missing.; 'password encryption aes' is missing.
password_encryption_config_02	FAIL	'key config-key password-encrypt <device_master_key>' is missing.
password_encryption_config_03	FAIL	'password encryption aes' is missing.
password_encryption_config_05	FAIL	'key config-key password-encrypt <device_master_key>' is missing.

control_00008 - ACL for VTY (94.7% compliant, 4 affected)

DEVICE	STATUS	FINDING
aaa_config_01	FAIL	ACL 'ACME_VTY_MGMT_ACL' rule #1: expected 'permit ip any any', found 'deny ip any 173.245.48.0 0.0.15.255'.
acl_vty_config_01	FAIL	No 'ip access-list extended' block found in the running configuration.
acl_vty_config_03	FAIL	

DEVICE	STATUS	FINDING
		ACL name 'ACME_VTY_MGT_ACL' does not match the corporate ACL name 'ACME_VTY_MGMT_ACL'.
acl_vty_config_05	FAIL	ACL 'ACME_VTY_MGMT_ACL' rule #1: expected 'permit ip any any', found 'permit ip 0.0.0.0 255.255.255.255 any'.

control_00009 - NTP (1.3% compliant, 74 affected)

DEVICE	STATUS	FINDING
aaa_config_02	FAIL	'ntp server 10.10.10.100 prefer': missing a 'key <id>' reference to the NTP authentication key.; 'ntp server 20.20.20.100': missing a 'key <id>' reference to the NTP authentication key.
